

Stereo Audio Video RF Modulator

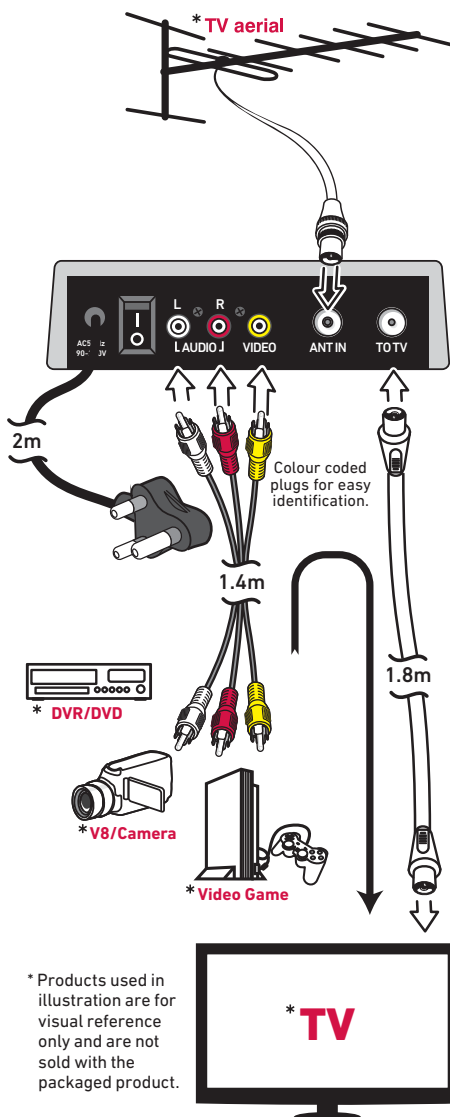

Product Code: **BPAVM**
Barcode: 6002844005894

Stereo Audio Video RF Modulator

An RF modulator converts audio/video signals from RCA cables to a PAL signal that can be received by a TV like a normal TV station. This makes it possible for you to use DVR/DVD players/Blu-ray player/Satellite/Home Theatre Systems, video game consoles and camcorders when your TV is not equipped with RCA audio/video sockets.

Basic Diagram

TECHNICAL INFORMATION

Specifications:

RF output level:	70 ±3.5dBuV
RF UHF output channels:	CH 21 - 69
RF input connector:	75 Ohm PAL/IEC (female)
Video input impedance:	75 ohm
Audio input impedance:	13±3K ohm
ANT IN ⇒ TO TV gain:	2 dB
AV input connectors:	3 RCA
RF output connector:	75 Ohm PAL/IEC (male)
Power source:	90 ~ 240 Vac

CONTENTS

- 1 x 3RCA to 3RCA Patchcord
- 1 x Coaxial Flylead with Male / Female Moulded Connectors.
